Pets Through History

Historians don't know for sure when humans started keeping pets. Dogs were one of the first animals domesticated by humans some 10,000 years ago. As early as 3500 B.C., Egyptians were domesticating wildcats from Africa. There is evidence that the ancient Romans kept dogs, birds, cats and horses. The cats and horses may have been considered working animals and not pets. Buddhist monks in China began to raise goldfish in ponds in the seventh century. By the fourteenth century, the Chinese were keeping them in bowls.
