National Children's Dental Health Month

Kids and adults alike tend to skimp on flossing and dread dentist visits. Attempt to sway negative opinions with fun Dental Health Month facts:

- Dental floss was first manufactured in 1882.
- If you floss once per day, you will use approximately five miles of floss over your lifetime.
- Just like fingerprints, everyone's tongue print is different.
- The tongue is the only muscle in the body that isn't attached to something else at both ends.
- In America, the Tooth Fairy exchanges an average of \$3.00 per lost tooth.
- Up until nylon was invented in 1938, bristle toothbrushes used hair from the back of a pig's neck!
