

FARM *of the* Month February

WHITE MOUNTAIN FARM

White Mountain Farm is located in an ancient lake bed called the San Luis Valley. It lies between the San Juan and Sangre de Cristo Mountains of the Southern Colorado Rocky Mountains.

Fun Facts About Radishes

They were cultivated in China and reached the US in 1629.

Radishes are members of the Brassicaceae family. The root is related to kale, broccoli, cauliflower, and horseradish, among others.

They are one of the quickest growing vegetables, so they are perfect for childrens' gardens.

The farm is owned by the New family, who settled in the San Luis Valley in the 1930's. They started growing wheat and alfalfa and raising sheep. Decades later, they now grow a lot of quinoa and a variety of other vegetables including Easter Egg Radishes.
