

Families Making the Connection

Healthy Active Children

Did you know that we have a Healthy Active Children Policy? The N.C. State Board of Education passed the policy to reduce obesity, address hunger and promote health. The policy includes the following:

- Local education agencies (LEAs) should establish a School Health Advisory Council (SHAC) of school, community and health representatives, families and students. SHACs should oversee the Healthy Active Children Policy, Local Wellness Policy (LWP) and coordinated school health.
- LEAs should have a LWP that includes goals for nutrition education and promotion, physical activity, and other activities to promote student wellness.
- K-8 schools should offer 30 minutes of physical activity every day. Elementary schools should move toward 150 minutes/week of physical education and middle schools 225 minutes/week of health education with certified teachers.
- Recess and physical activity should not be taken away as a form of punishment.
- LEAs should have guidelines for all foods and beverages on campus, offer healthy food/beverage options for students, limit marketing to only healthy foods/beverages, offer nutrition education and choose options other than food to reward students.
- LEAs should evaluate progress, complete annual reports, and share the results.
