Choose Low Fat Dairy

Familiar with MyPlate? MyPlate helps families build a healthy plate for meals. MyPlate includes five food groups. Dairy is shown in blue. The dairy group includes milk and milk products, like cheese, yogurt and cottage cheese. School breakfasts and lunches offer a choice of low fat or fat free milk each day.

Did you know milk is power-packed with protein, calcium, phosphorus, vitamins D, A and B12, riboflavin, pantothenic acid, niacin and more? Protein helps build and repair muscle tissue. Calcium, phosphorus and vitamin D help build and maintain strong bones and teeth. Vitamin A helps keep skin and eyes healthy. Milk also contains B vitamins (B12, riboflavin, pantothenic acid and niacin), which help our bodies convert food into fuel.

Milk isn't just for kids. The nutrients in dairy are important at every stage of life. Choose low fat or fat free dairy milk or yogurt. Individuals who are lactose intolerant can choose low lactose and lactose free dairy products. For folks who choose dairy alternatives, fortified soy beverages and soy yogurt -which are fortified with calcium, vitamin A, and vitamin D, provide key nutrients.
