Honey Bees

Pollinators, like honey bees, are important to the production of the fruits and vegetables we eat every day, such as apples, blueberries, and squash. Without honey bees, our grocery stores would look much different—many shelves would be empty!

Did you know?

- A honey bee can visit between 50-1,000 flowers in a single trip.
 - An average beehive can hold 50,000 bees.
- Honey bees have sticky bodies that are covered with many hairs that the pollen sticks to.

Monday	Tuesday	Wednesday	Thursday	Friday
