Honey Bees

Pollinators, like honey bees, are essential to the production of the fruits and vegetables we consume daily, such as apples, blueberries, and squash. In fact, bees are responsible for 1/3 of the food we eat, contributing about \$20 billion to the value of U.S. crop production.

- A honey bee can visit between 50-1,000 flowers in a single trip.
- An average beehive can hold 50,000 bees.
- Honey bees have sticky bodies that are covered with many hairs that the pollen sticks to.

Monday	Tuesday	Wednesday	Thursday	Friday
